

Cultural Tips For The Successful Grower

Remaily

Remaily: Introduced from the New York State Agricultural Experiment Station in 1980. American; Seedless. Large, oval, white seedless table grape. Good texture, sweet flesh with adherent skin. Moderately hardy vines. Very vigorous, bears large crops. Cluster thinning maybe necessary. Ripens from mid August to early September. Hardy to approximately 0 degrees F. Zone 6-8

Planting Instructions: Grapes prefer a light soil with good drainage and moderate to high fertility. Soil should be kept moist the first year after planting, but the grapes will stand short dry periods in following years. A spring application of fertilizer (a balanced blend) is recommended. Plant grapes in early spring, pruning back top growth to two or three buds at planting time. Prune roots to avoid wadding of roots in planting hole. Grapes should be planted one inch deeper than plants grew in the nursery, and spaced eight feet APART for maximum performance.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Remaily	6-8 	 ↑ Mid August	 Large	Seedless	Full Sun 	Sweet	8-10 feet
